

BRUNETTE Disc Scalping Screen

The Brunette Disc Scalping Screen IFO (Interface Opening) is arranged to be progressive. As material flows over the screen, the IFO increases to meet your sizing requirement.

The rugged main frame, oversize shafts, and heavy duty bearings minimize maintenance and improves the performance of the Disc Scalping Screen.

FEATURES:

- Heavy Duty Main Frame
- Consistent Uniform Screening
- Designed to Suit Various Capacity & Classification Specifications
- Optional 3-Stage Screening Available
